Regulatory Division

The Regulatory Program administers and enforces Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. Under the authority of the Army of Engineers, the Regulatory Program manages the waters of the United States. Section 404, a permit is required for fill material in navigable waters and wetlands in the nation are waters of the United States and are under the authority of Army Corps of Engineers Section 404 regulatory authority. Walla Walla District regulates those navigable waters, including wetlands, most perennial and intermittent rivers and streams, ponds and ponds, as well as irrigation, drainage canals and other waters located within the State of Idaho.

The Department of the Army Regulatory Program is one of the oldest in the federal government. Initially, it served a fairly simple purpose: to protect and maintain the navigable capacity of the nation's waters. Changing public needs, evolving policy, court decisions and new statutory mandates have changed several aspects of the program, including its breadth, complexity and authority.

JOINT APPLICATION FOR PERMIT NWW-1145-1/IDWR 3801-1

The Department of Army Corps of Engineers (Corps), the Idaho Department of Water Resources (IDWR), and Idaho Department of Lands (IDL) has established a joint process for activities impacting jurisdictional waterways that require review and/or approval of both the Corps and the State of Idaho.

Department of Army permits are required by Section 10 of the Rivers & Harbors Act of 1899 for any structure(s) or work in or affecting navigable waters of the United States and by Section 404 of the Clean Water Act for the discharge of dredged or fill materials into waters of the United States, including adjacent wetlands.

State permits are required under the State of Idaho, Stream Protection Act, Title 42, Chapter 38, Idaho Code & Lake Protection Act, Section 58, Chapter 13 et seq., Idaho Code.

[Engineer "No-Rise" Certification Form](#)
[Idaho Department of Lands Attachment for Encroachment](#)

A complete application packet is required to properly process any application. Applicant will need to send a completed application, along with one (1) set of legible and reproducible drawings illustrating the location and the character of the proposed activities/project to both the Corps and the State of Idaho. Information provided on this application will be used in evaluating the proposed activities, which
